- (2) Passwords are randomly hashed and salted, protecting against dictionary and brute-force attacks.
- (3) Credit card fields are injected by Stripe, so payment information is never directly handled by THS.
- (4) THS uses Sqreen to provide protection against a wide array of attacks, including but not limited to SQL injection, JavaScript injection, cross-site scripting and brute-force attacks. Sqreen also provides analytics on potential malicious users. For more information, please visit <https://www.sqreen.io>.
